FOR IMMEDIATE RELEASE

State of Idaho to Lead the Nation with Online Access to ePlan Services

Idaho's CAS (Customer Access System) Program to Include Electronic Plan Submission, Review and Distribution through ProjectDox® ePlan Solution

Scottsdale, Ariz. — October 28, 2008 — Avolve Software, developers of ProjectDox® communication and collaboration software, announced today that the State of Idaho will deploy the company's ProjectDox® ePlan solution as part of its CAS state-wide citizen services initiative. Through its Division of Building Safety, Idaho becomes the first state in the U.S. to implement a state-wide ePlan service program to citizens and multiple state agencies.

ProjectDox® will enhance the CAS program by allowing the State to offer web-based electronic file submission and review to citizens, architects and developers who depend upon the Division of Building Safety for code-compliance review of construction and engineering plans. Key benefits include expedited plan approval and reductions in paper use, printing costs, storage costs, deforestation, drive-time, gasoline consumption, and greenhouse gas emissions.

"We're proud to be the first in the nation to officially endorse and commence the implementation of an end-to-end electronic, automated plan submission and review system state-wide," said C. Kelly Pearce, Administrator of the Division of Building Safety. "The expansion of CAS with ePlan services represents another important step in our efforts to elevate customer service, preserve the environment and communicate more effectively with our customers and other governmental entities."

The Division of Building Safety envisions making its ePlan services available to other state agencies such as the State Fire Marshal and the Bureau of Homeland Security for the purposes of enhanced disaster response, mitigation and management.

(More)

“Implementing ePlan services within CAS at the state level demonstrates Idaho’s forward-thinking and innovative approach to serving citizens and streamlining operations,” said Ron Loback, President and CEO at Avolve Software. “It’s a great honor to be selected and to engage in a program that is designed to exploit the full potential of our product with respect to a state-wide user community and collaboration between multiple agencies.”

About Idaho and the Division of Building Safety

As the fourteenth largest state in the United States, Idaho is home to nearly 1.5 million residents. Abundant outdoor recreation opportunities and scenic vistas attract over 20 million tourists annually. The mission of the Division of Building Safety is to safeguard life and property for the citizens of the State of Idaho by ensuring proper building design in the areas of electrical, plumbing, heating, ventilation, and air conditioning (HVAC) and to promote public safety through the licensing of public works contractors and by conducting on-site inspections in accordance with all applicable state and federal codes and regulations. The Division also operates an industrial safety program to ensure the safety of elevators, escalators and boilers throughout the state. DBS is also the host agency for the Idaho Modular Building Advisory Board as well as the Idaho Manufactured Housing Board.
